

EMPLOYER MANDATED VACCINATION

Effective September 2021

While the Alberta College of Paramedics (College) acknowledges the health practice of vaccination as a safe and effective public health measure in the prevention of infectious diseases, the College is neither a subject matter expert in immunology or virology, nor the regulator of such classification of healthcare professionals.

The College defers the decision of what is in the best interest of Albertans on the matter of mandatory vaccination to Alberta Health and the healthcare professionals who are experts.

Additionally, as the College is the regulator of individual regulated members of the paramedic profession and not the employers who create employment policies or contracts, the College has no authority to intervene in employer policies that specify mandatory vaccination.
